

Bulk Actions in Listen

Clean up and segment your data faster with bulk actions in Listen. This article will cover the available bulk actions in Listen that your team can use to manage multiple mentions at once.

Applying bulk actions

1. When viewing a saved search in Listen, toggle on **Select multiple** on the right-hand side of the screen.
2. Check the box on the right-hand side of any mentions which you would like to action, selecting up to 100 mentions at a time.
3. In the **Bulk Action menu** that appears on the right-hand side of the screen, select the appropriate action (Change sentiment, Add Tags or Delete) and

confirm the action.

The screenshot shows the Twitter 'Mentions' interface for the search '#ukulelelove campaign'. The interface is in the 'Uniform layout' view, displaying a grid of tweets. The 'Mentions' tab is active, and the search results are sorted by 'Newest First'. The interface includes a sidebar with navigation icons, a top bar with search and filter options, and a right sidebar with action buttons like 'Export', 'Change sentiment', 'Add tags', and 'Delete'.

Additional options

Switch between **Uniform layout** and **Masonry layout**.

- **Masonry layout** is a traditional wall-style layout that makes the best use of space, allowing you to see more mentions at once while scrolling.
- **Uniform layout** (the default) is optimized for legibility and accessibility – allowing you to review and select mentions more easily. In uniform layout, mentions are laid out in a grid which makes it perfect for:
 - Skimming through mentions quickly and selecting them precisely with your mouse
 - Tabbing through mentions using keyboard navigation
 - Easily finding your way around mentions lists with the use of a screen reader
