

## Editing and Deleting Measure Widgets

All widgets in Measure offer some level of customization. You can edit or delete any widget by following the steps below:

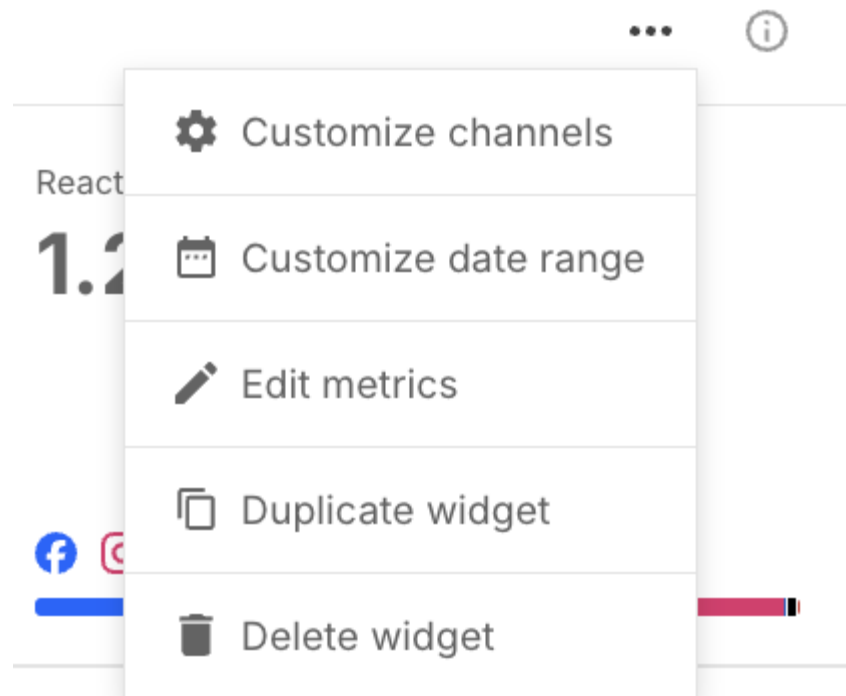

1. While viewing a dashboard, click the **three dots icon** in the upper right corner of the page and select **Edit**.

2. To adjust the size or position of a widget, drag and drop it using the kebab icon.

3. To customize a widget's channels, date range, or metrics, click the three dots icon in the upper right corner of the widget. You can also **duplicate** or **delete** the widget

from this menu.

4. If your widget supports [filters](#), you can customize these by clicking the **funnel icon**.

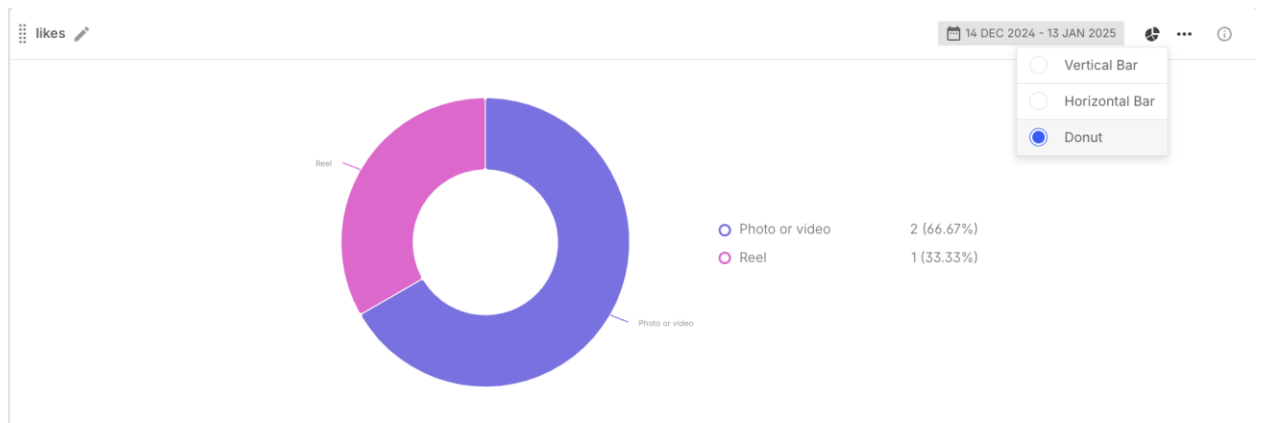

The screenshot shows a 'Content performance' widget interface. At the top, there's a header with 'Content performance' and a funnel icon. Below the header, a table lists posts. A filter menu is open, showing options: Labels, Type, Placement, Promotion, Visibility, and Ad Meta Platform. The table has columns for DATE, POSTS (1.57K), and performance metrics. The posts are from 'The Hound Pits Pub' and 'Nope Ropes'.

DATE	POSTS	1.57K
8 Mar 2024 4:57 PM		Far Reach @ The Hound Pits Pub Promoted
18 Sep 2024 2:43 PM		@ Nope Ropes Promoted

SHOW MORE

5. If your widget supports different views or chart types, you can customize these by clicking

the **view** or **chart** icons.

6. Once everything looks good, click **Save Dashboard** in the upper right corner of the

dashboard to exit Edit mode.
