Section: Decks

Deck Editor

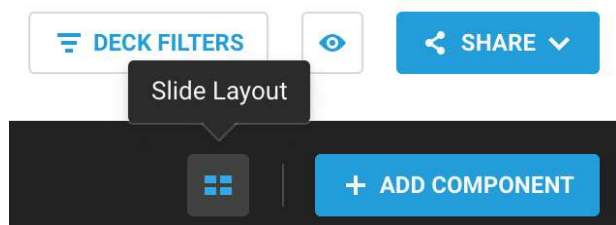

2 years ago · Updated · **Print/PDF** 

Translate this article: 

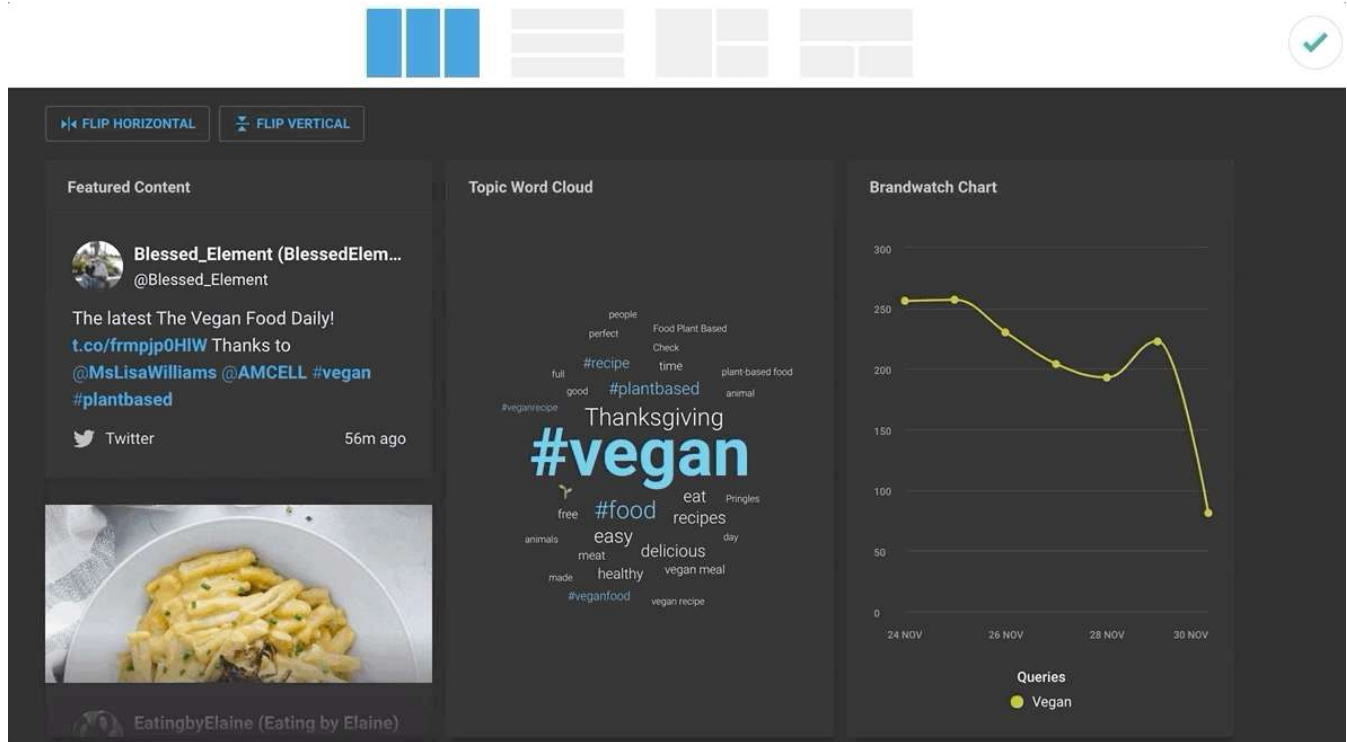

Once you have created and opened a deck you will be brought to the deck editor interface. There are multiple options available in this section.

Customize Layout

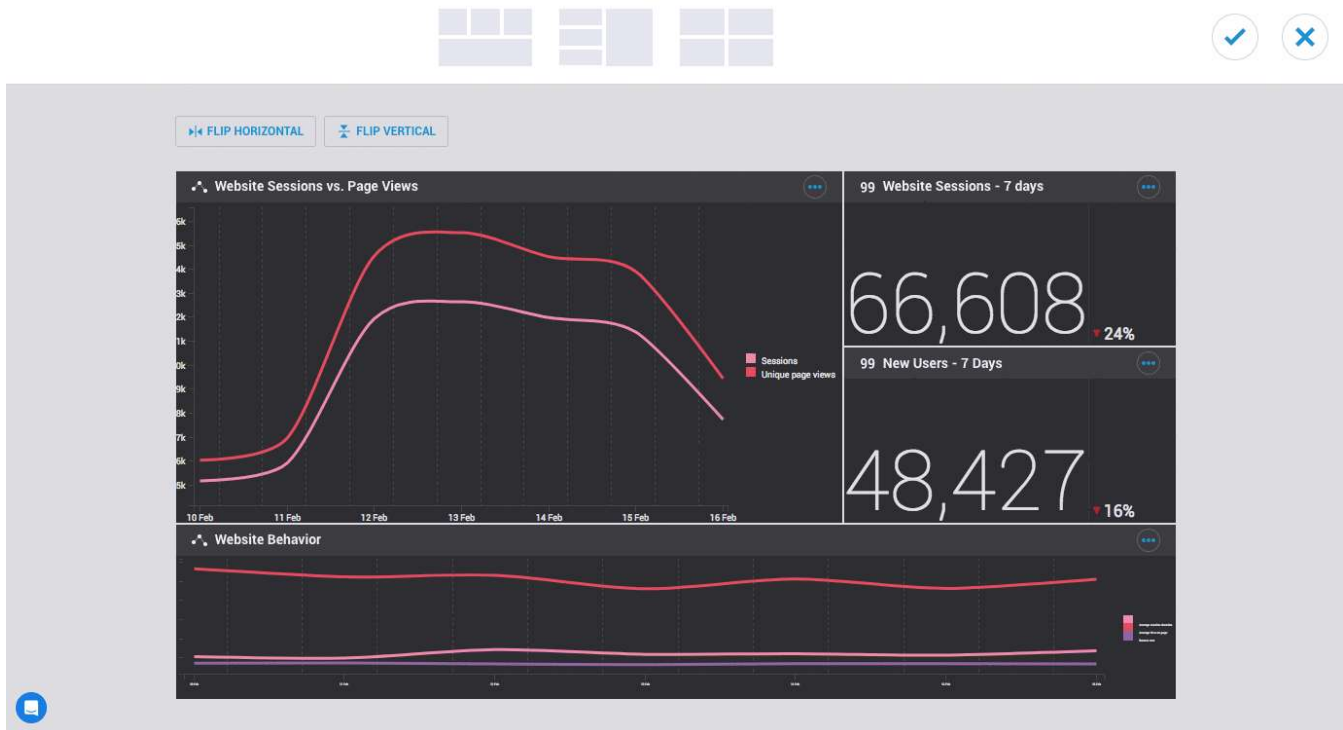

After adding **Slides** and **Components** to the deck, you can customize the layout of the components in each slide.

The options will vary depending on how many components you have in your slide. Here is an example with 3 components:

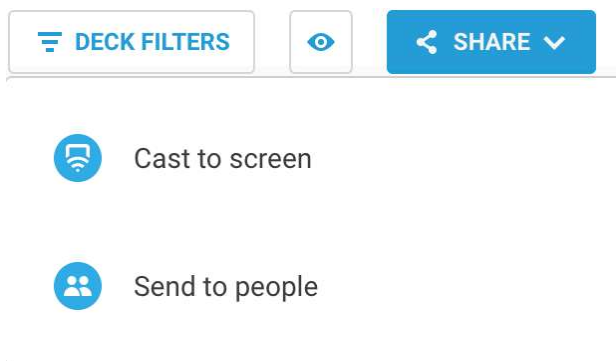

You can also drag and drop components within the slide to rearrange them, or flip them horizontally and vertically.

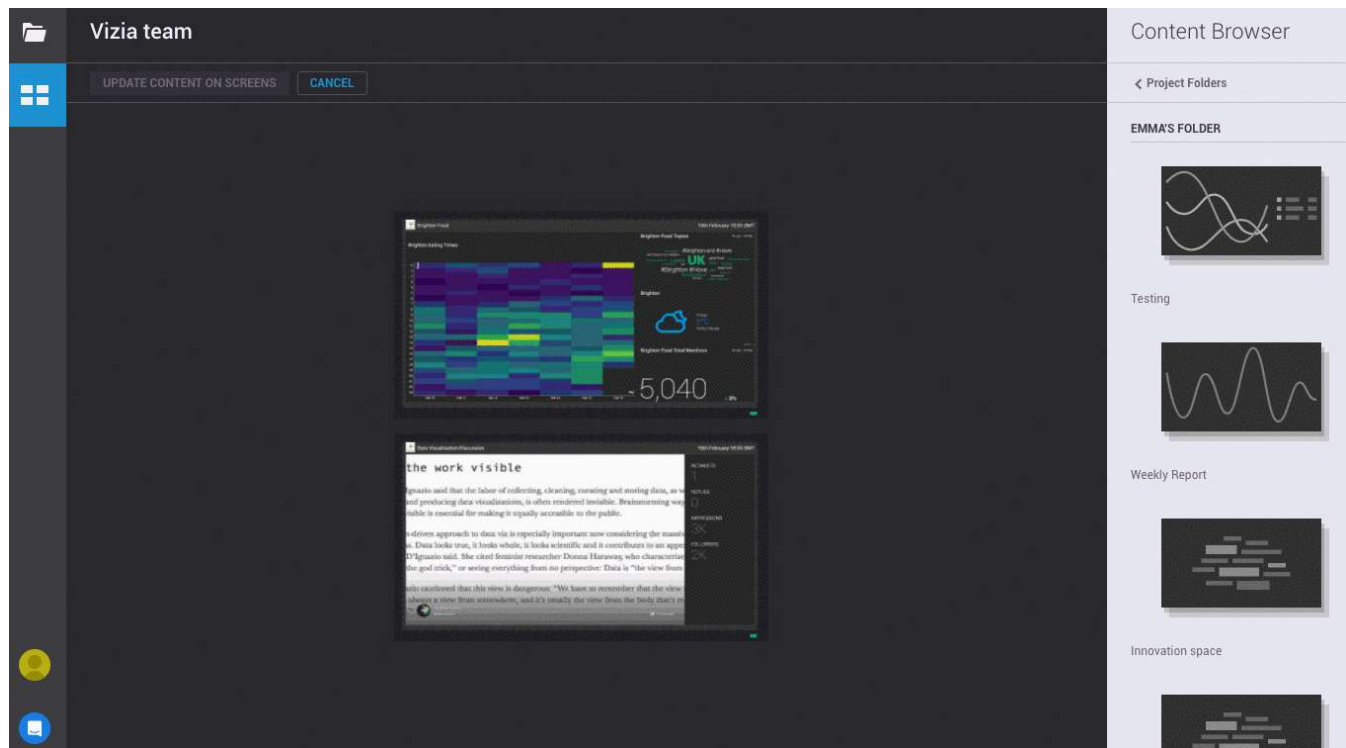

Distribution

From the Deck Editor, you can distribute your content to any of the screens in your network.

Simply click **Share** then **Cast to screen** and pick your desired installation.

This will bring you to the **Distribution Hub** where you can drag and drop your decks onto the screens around your organization.

Find out more about the Distribution Hub [here](#).

Deck Filters

Adding a filter to a deck will filter every single component within the deck, although you may override this afterwards by filtering a component individually if needed.

Deck Filters

×

Affects all components with date ranges.
