NSFW Filter: Explicit Images

Translate this article: 

Due to the nature of internet, we can quite often come up against offensive and distasteful imagery. Oftentimes this can't be avoided but we realize that our customers need to be safeguarded against this content when using Vizia.

This feature looks to prevent this from happening by filtering the images that are displayed on a Vizia screen.

The Not Safe For Work Filter is managed at a folder level and is automatically set to 'moderate' for all accounts and folders.

2/4

There are three levels of confidence that can be set on the offensive imagery threshold :

- **None** : no filtering takes place.
- **Moderate** : accept nudity/partial nudity limiting the number of not offensive images being falsely blocked
- **Strict** : block 99% of offensive images with a risk of blocking not offensive images

When 'strict' filtering is chosen there is a risk of eliminating false positive images.
