Managing a User's Access to the Content Pool

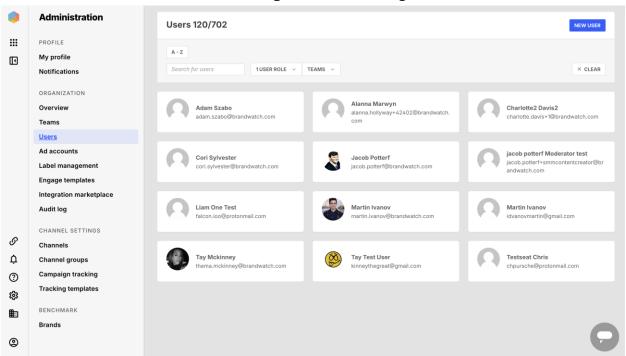

Access to the Content Pool can be defined on a user by user basis. By default, all users have full access permissions to add, edit, copy, download, and delete content.

However, Social Media Management users with a <u>user role</u> of **Admin** or **Team Leader** can choose to revoke this access from individual users. To get started, please follow the steps below:

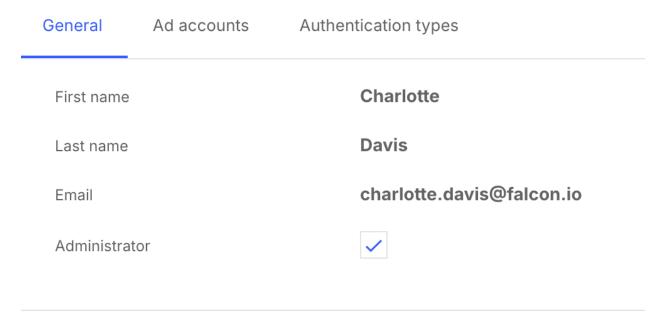

1. From the lower left corner of the platform, click the **Settings** icon, then **Organization admin**.

2. From the menu on the left, under the Organization heading, click Users.

- 3. Select the user. This takes you to their **General** settings.
- 4. Click Show Advanced.

SHOW ADVANCED Y Feature access, user expiration & geo targeting

 Under Access, select or deselect Access to content pool, then click Save Changes.
